

Positive Covid Test

If a child/adolescent tests positive for COVID-19, team coaches should be notified by email so appropriate notification can be performed according to local policy and protocols. All individuals who test positive should follow [CDC guidance for isolation](#). This guidance includes the following:

- Regardless of vaccination status, the COVID-19-positive individual should isolate at home for a minimum of **5 days**.
- After a full 5 days have passed from symptom onset or positive test result, the individual may end isolation if asymptomatic or symptoms are improving. Individuals with fever must remain in isolation until a minimum of 24 hours have passed while off fever-reducing medication.
- All individuals who test positive for COVID-19 must mask when around other club members for a full 10-day period. This includes all physical activity.

Thank you for your cooperation in helping to keep our players and their relatives as safe as possible.
